

Mid-West[®] Instrument

The *Ultimate* Backflow Test Kits

Model 855 Digital Backflow Test Kit & Machbackflow App

Welcome to the future of backflow prevention testing: The Mid-West[®] Instrument model 855 digital test kit powered by the MachBackflow app from WTM Solutions.

- Easy learning transition from the model 845-5[®] test kit
- Extensively tested in the lab and in the field.
- Crafted from proven materials making it ready for the rigors of daily testing.

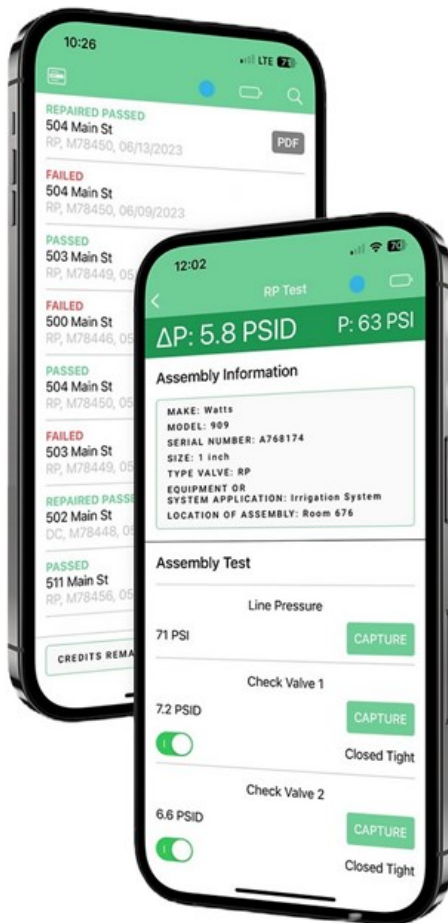

Your purchase includes:

- Complete model 855 test kit and accessories.
- MachBackflow app basic features for the life of the product.
- Premium subscription features for 30-day trial.

Phone not included.

MachBackflow app is available for Android and iOS phones in the app stores.

Basic Features:

- Read ΔP and line pressure digitally on your phone.
- Record test values with capture buttons or toggle switches.
- Test fields change based on the assembly type selected.
- Special program for capturing PVB air inlet opening point.
- Saves all tests results to the cloud.

Premium Features: (Requires subscription after 30 days)

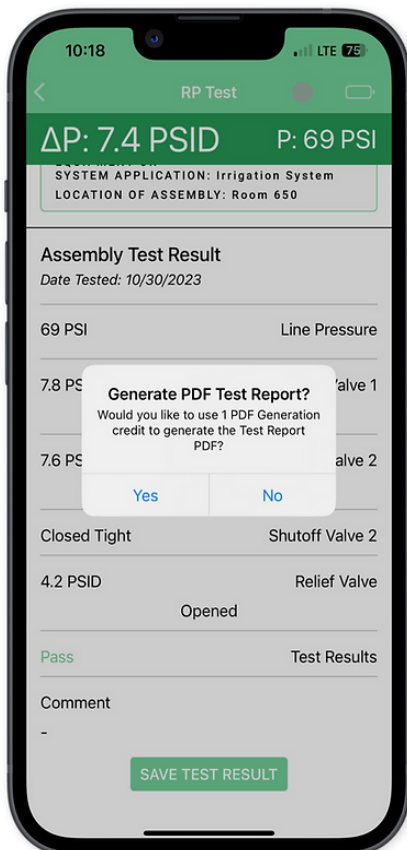

- Autofill customer & assembly information by searching previously tested assemblies.
- Download the day's test data into a .csv spreadsheet for easy review or upload the completed tests to another program.
- Generate PDFs to save, share, or e-mail.

Model 855 Digital Backflow Test Kit & Machbackflow App
